SUMMARY

Software engineer and 2026 B.S. Software Development graduate with experience across two software roles building full-stack web applications, REST APIs, and automation. Comfortable in Java, C#, Python, TypeScript, and SQL, with a focus on clean code, testing, and CI/CD. Seeking a Software Development Engineer role on a team shipping production software.

EXPERIENCE

Automation Engineer (Intern) | Byline Bank

Apr 2026 – Present

- Build automation for IT and other departments on the Microsoft Power Platform (Power Automate, Copilot Studio) with PowerShell integrations.
- Automated Active Directory account-lockout response with a PowerShell service and Power Automate flow that notifies users by email and Teams and alerts the help desk, including mass-lockout detection when 5 or more users lock out within 4 hours; saves an estimated \$20K per year.
- Built SharePoint change monitoring for external-collaboration sites using PowerShell webhooks that post to Power Automate and notify the site owner on any change.
- Built a Copilot Studio assistant over SharePoint knowledge sources that answers employee questions and opens Freshservice IT tickets from chat.

Software Developer | FamilyCore

Sep 2025 – Apr 2026

- Built a REST API layer in ASP.NET Core with request validation, structured logging, correlation IDs, and policy-based authorization.
- Designed a multi-schema PostgreSQL data layer with Entity Framework Core, including document ingestion, OCR, and search.
- Containerized the full stack with Docker Compose (ASP.NET Core, PostgreSQL, object storage).
- Implemented Hangfire background jobs for async processing with automatic retries and status tracking.
- Wrote integration tests with xUnit, Testcontainers, and Moq with per-test data isolation, and built an evaluation suite to catch regressions.

EDUCATION

Grand Canyon University | B.S. Software Development

Graduated April 2026

PROJECTS

KnowledgeMarket | Full-Stack Course Marketplace — ASP.NET Core, React, PostgreSQL, Stripe, Docker

- Built a full-stack marketplace with a React 19 SPA and an ASP.NET Core API serving 40+ endpoints across auth, catalog, orders, content, reviews, and admin.
- Integrated Stripe for payments with webhook-driven order fulfillment and automatic retry on failed charges.
- Designed a multi-schema PostgreSQL layer with EF Core and full-text search; JWT auth with HttpOnly cookies and CSRF protection.

Pulse Chat | Real-Time Chat System — Go, WebSockets, Redis, RabbitMQ, PostgreSQL, Docker

- Built a horizontally-scalable, multi-room chat system in Go with WebSocket transport, Redis Pub/Sub fan-out, RabbitMQ durable workers, PostgreSQL message history, and Prometheus metrics, containerized for scaling.

TECHNICAL SKILLS

Languages: Java, C#, Python, TypeScript, JavaScript, SQL, Go

Backend: ASP.NET Core, Entity Framework Core, REST APIs, Spring Boot, Node.js / Express, JWT Auth

Frontend: React, Next.js, TypeScript, HTML/CSS

Databases: PostgreSQL, SQL Server, MySQL, MongoDB, Redis

DevOps & Cloud: Docker, Docker Compose, Kubernetes, CI/CD, GitHub Actions, AWS (S3, RDS, ECS), Google Cloud (GCP), Nginx

Testing & Practices: xUnit, Testcontainers, Integration Testing, Agile / Scrum, Git, Postman, Swagger/OpenAPI
