SUMMARY

Full stack developer and Bachelor of Science in Software Development graduate who builds backend services and RESTful APIs with C# and modern .NET and responsive front ends with Angular and TypeScript. Comfortable across SQL Server, PostgreSQL, Microsoft Azure, and CI/CD, able to deliver features end to end, participate in code reviews, and collaborate with cross-functional teams.

EXPERIENCE

Automation Engineer (Intern), Byline Bank

April 2026 - Present

- Built and maintained internal web tools and workflow automation on the Microsoft stack, coding to written specification and documenting each solution, with Git version control, strong problem-solving and communication skills, and collaboration across cross-functional teams.
- Automated company-wide Active Directory lockout recovery with a background service and Power Automate flow that emails and Teams-messages locked-out users a password-reset link, deflecting about 80% of password-reset tickets from the help desk and avoiding a third-party tool that would have cost about \$20,000 per year.

Software Developer, FamilyCore

September 2025 - April 2026

- Built and maintained backend services and RESTful APIs in ASP.NET Core 8 with C#, with request validation, structured logging, rate limiting, and security headers.
- Designed a PostgreSQL relational data layer with Entity Framework Core, composite and unique indexes, and parameterized SQL for reporting queries.
- Integrated a large language model with retrieval to power a user-facing AI assistant that lets users reach their documents and data in natural language, using microservices-style separation and event-driven background processing.
- Implemented CI/CD with Docker and containerization, participated in code reviews, and grew the test suite to 622 automated tests with xUnit, Moq, and Testcontainers for 85% line coverage.

EDUCATION

Grand Canyon University, Bachelor of Science in Software Development

Graduated April 2026

GPA 3.63 / 4.0 · Honors College

PROJECTS

KnowledgeMarket - Full-Stack eCommerce Marketplace *C#, ASP.NET Core, Angular, TypeScript, SQL Server, Docker*

- Built a full-stack marketplace on a .NET 9 ASP.NET Core API serving 70+ REST endpoints across 7 domain modules, backed by SQL Server with Entity Framework Core.
- Built a responsive Angular and TypeScript single-page front end with a role-gated admin panel and JWT authentication.
- Integrated the Stripe API with webhook-driven fulfillment and covered the app with automated tests across unit, component, and end-to-end suites.

AWS Cloudathon - 3rd Place

- Placed 3rd in an AWS-hosted Cloudathon.

Open Source - [alecthomas/kong](#) *Go*

- Contributed a merged pull request to kong, an open-source command-line library with 3,000+ GitHub stars, adding support for a node with a Run() method to run without a subcommand.

TECHNICAL SKILLS

Languages: C#, SQL, TypeScript, JavaScript, Java, Python

Backend: Microsoft .NET, ASP.NET Core, REST APIs, Entity Framework Core, microservices, Node.js

Frontend: Angular, TypeScript, JavaScript, HTML, CSS, responsive UI

Cloud and DevOps: Microsoft Azure, AWS, Docker and containerization, CI/CD pipelines, Git version control, GitHub Actions, Agile/Scrum

Databases and Testing: SQL Server, PostgreSQL, MySQL, unit and integration testing, TDD
